DETAILED ACTION

EXAMINER'S AMENDMENT

EX. Amndt

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Scott E. Baxendale on 11/23/04.

The application has been amended as follows:

IN THE CLAIMS:

Have canceled non-elected claims 11, 15, 16 and 18-20.

Election/Restrictions

Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 6, 7, 9, 10, 13, 14, directed to non-elected species no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double

patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

Claims 1-10, 12-14, 21 and 22 are allowed.

The following is an examiner's statement of reasons for allowance:

An ion plating apparatus including a vaporizing material source, an RF power source and a bias power source coupled to a substrate holder, wherein the bias voltage source having a negative bias component and a pulse positive bias component with a cycle in a range of 1kHz to 1GHz; and

a controller controlling the apparatus so that initially the RF power source does not supply power and a plasma is generated by the bias power source such that vaporizing material source is not vaporized and after the preliminary plasma processing step, the RF power source supplies power to form a plasma to vaporize the vaporizing material source.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
